

Discover Transylvania 2020

Brevard High School's TIME 101 Research Class is excited to present "Discover Transylvania 2020," a project designed to empower all citizens to become scientists and make observations in their own backyard and neighborhood with the iNaturalist app. These observations will then be available to scientists and naturalists worldwide! Classified as a temperate rainforest, Transylvania County has an abundance of life and great biodiversity, so "observe" as many different plants, animals, and fungi as you can. We are known for our white squirrels, so try to get pictures of those if possible! It is really important for us to come together as a community right now, while we remain apart. We hope you will join us in celebrating our beautiful home...you might discover something new!

Join Discover Transylvania 2020!

- Who? Anyone in Transylvania Co.
- When? Anytime during May 6 - 22
- How? Download the iNaturalist app on a smartphone and "make observations" of wild animals, plants and fungi (not people, pets or landscaping plants)
- Why?
 - Become a scientist!
 - Learn new species of life!
 - Contribute observations to a local initiative and a global database
 - Become part of a community of naturalists
 - Get outside and enjoy nature!
 - Discover something rare or even new to science!
